

CITY OF POCATELLO

JOB DESCRIPTION / CLASSIFICATION SPECIFICATION

Position Title:	WPC Lab Tech II				
Pay Grade:	G07		FLSA Status	Non-Exempt	
Department	Water Pollution Control		Supervised By:	Pretreatment/Laboratory Supervisor	
FTE:			Position #:		
Date Established:	8/2022	Date of Review:		Date of Revision:	7/2025

CLASSIFICATION SUMMARY

The WPC Pretreatment and Laboratory Technician II works under general supervision and supports compliance with the Federal Clean Water Act and the success of the City of Pocatello Pretreatment Program. The position engages with business owners and operators throughout the city and is responsible for performing pretreatment inspections and administrative tasks to ensure commercial and industrial business are operating in accordance with federal, state and city regulations relating to discharges into the wastewater collection system. The position collects wastewater discharge from Significant Industrial Users (SIUs) for analysis to ensure compliance with City ordinances and state and federal wastewater regulations. The job implements the City's Sewer Use Ordinance along with Pretreatment Regulations and Sanitary Sewer Regulations. The position responds to and investigates complaints and spills.

In addition to pretreatment duties, the position is responsible for performing a wide range of highly technical and specialized laboratory analyses using advanced instrumentation in support of the City's wastewater, environmental, and water utility operations. The job collects samples and performs laboratory testing and analysis on the City's wastewater treatment plant, industrial businesses, storm runoff, biosolids and the Portneuf River for compliance analysis and testing to ensure compliance with state, federal regulations and applicable standards. The position participates in 24-hour sampling events pursuant to IPDES permit regulations. These events are scheduled to occur twice per year over a duration of one week during which time workhours are adjusted to accommodate sampling requirements.

The Pretreatment and Laboratory Technician II position requires Pretreatment Facility Inspector Certification and a State of Idaho Wastewater Laboratory Analyst Class II License, or the ability to obtain required certification and licensure within specified time periods. The position works under general supervision and requires knowledge of pretreatment, environmental, sampling and testing regulations. The job requires specialized on-the-job training and continuing education in the wastewater, drinking water, and pretreatment fields. Error, omission or negligence in performance could have serious consequences to the plant process, public safety and the environment. This could lead to potential legal and financial liability due to non-compliance with federal and state requirements.

The job requires substantial knowledge of methods, equipment, materials, tools, IPDES permit regulations, and standard practices for sampling/testing of water quality, industrial and commercial waste discharges, and quality control/quality assurance requirements. The job includes maintaining an inspection database and

CITY OF POCA TELLO

JOB DESCRIPTION / CLASSIFICATION SPECIFICATION

30 associated records and logs, including compliance records, reports and correspondence. The job requires the
31 ability to create and maintain standard operating procedures, quality control reports, quality assurance reports,
32 operating charts, bench sheets/forms, and best management procedures for the lab. The job also includes
33 cleaning, calibrating and maintaining lab and sampling equipment.

34 The job requires specialized on-the-job training and continuing education in the wastewater, pass State of
35 Idaho drinking water testing requirements, and pretreatment fields and assists in training lesser experienced
36 Pretreatment and Laboratory Technicians.

37 The position participates in community education and outreach on wastewater pretreatment and related
38 environmental programs by developing educational materials and performing presentations at schools and
39 various outreach events.

40 The job requires the ability to maintain a collaborative and cooperative working relationship with elected and
41 appointed officials, other City employees, other organizations, business owners, industrial employees, and the
42 general public.

43 The work environment includes a wastewater treatment facility, office, laboratory, and a variety of field testing
44 and inspection environments, including rivers and industrial facilities. These work environments may include
45 protected exposure to infectious bacteria, bodily fluids, hazardous chemicals and gasses, wastewater
46 treatment equipment, noisy and/or loud equipment, hazardous or toxic waste material, adverse weather
47 conditions, high traffic areas, and the hazards involved in collection of water samples from rivers and industrial
48 facilities. The noise level is generally moderate.

49 **ESSENTIAL DUTIES AND RESPONSIBILITIES** *(illustrative only and may vary by assignment)*

50 Performs monitoring and enforcement of the pretreatment program by collecting/analyzing commercial and
51 industrial wastewater samples. Conducts inspections, monitors and collects wastewater discharge, and
52 investigates complaints and spills to ensure the City remains in compliance with the Federal Clean Water Act
53 and other applicable City, state, and federal wastewater discharge statutes and requirements. Maintains legally
54 defensible inspection records and logs.

55 Tracks permits and evaluates data and other reports to determine compliance of permitted facilities.

56 Collects and prepares samples from a variety of sources for laboratory analysis, ensuring proper handling and
57 chain of custody protocols are followed. Participates in periodic sampling events that take place over a 24-
58 hour period, which necessitates longer and variable shifts during the sampling event.

59 Performs laboratory testing on samples to ensure the City remains in compliance with the Federal Clean Water
60 Act and other applicable City, state, and federal wastewater discharge statutes and requirements. Performs
61 laboratory testing of treatment plant effluent and industrial and commercial wastewater, drinking water, storm
62 runoff, river, and biosolids.

CITY OF POCA TELLO

JOB DESCRIPTION / CLASSIFICATION SPECIFICATION

63 Maintains legally defensible testing records, logs, databases and reports. Prepares periodic reports. Maintains
64 inventory of testing chemicals and reagents.

65 Maintains the safety and hygiene of laboratory and other work spaces. Cleans, calibrates, troubleshoots and
66 performs preventative maintenance on laboratory sampling, testing and analysis equipment.

67 Assists in creating and presenting public programs on wastewater pretreatment and related environmental
68 programs. Prepares public education materials and conducts public outreach (examples would include
69 information meetings or workshops, brochures, fact sheets). Participates in events such as classroom/school
70 events, Water Week, Portneuf Environmental Fair, Drug Take-Back program and STEM events.

71
72 Attends and completes assigned training as required to ensure compliance with City policy, state and federal
73 regulation, and maintain professional licensing and certification.
